2676

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 June 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-21 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-21 are rejected under 35 U. S.C. 103(a) as being unpatentable over Hofmann (USPN 5396233) in view of Brown (US 2003/0065630 A1)

2. In regard to claim 1, 9, 21, Hofmann teaches a method for identifying and registering a vehicle, comprising: receiving and storing vehicle identification and registration information in a remote control unit (central computer); comparing (checking) the information stored in the remote control unit with data stored in the vehicle; see col.1 lines 57-col.2 line 5; and displaying at least a portion of the vehicle identification and registration information on an electronic license plate. See col.3 lines 6-10; transferring the vehicle identification and registration information in the remote control unit to the vehicle (central computer transfers registration and identification information onto the card (data carrier) and the reading means of motor vehicle read the data), see col.1 line 55 – col.2 line 5. Hofmann does not wireless transmission; However, Brown teaches transferring the data to and from the remote unit (data base server) by wireless transmission. See page 7 paragraph 101. It would have been obvious to a person of ordinary skill in the art at the time of the invention to incorporate the system of Brown into the system of Hoffman because the wireless transferring system of Brown would allow the

cumulative data base controlling the release of vehicle identification and registration number independent of the location of the user. See page 5 paragraph 71.

3. In regard to claim 2, Hofmann teaches a method for identifying and registering a vehicle, wherein said receiving includes downloading vehicle identification and registration information from an authorizing agency's database to a customer's personal computer. See col.6 lines 17-50.

4. In regard to claim 3, Hofmann teaches a method for identifying and registering a vehicle, wherein said downloading includes transmitting the vehicle identification and registration information to the personal computer over the Internet. See col.6 lines 17-50.

5. In regard to claim 4, Hofmann teaches a method for identifying and registering a vehicle, further including transmitting credit card (magnetic card) information to the authorizing agency to pay a fee associated with receiving the vehicle identification and registration information. See col.3 lines 54-60.

6. In regard to claim 5, Hofmann teaches a method for identifying and registering a vehicle, wherein said comparing includes transmitting the vehicle identification and registration information to the vehicle to replace the data stored in the vehicle if the vehicle identification and registration information is new. See col.8 lines 59-68.

7. In regard to claim 6, Hofmann teaches a method for identifying and registering a vehicle, wherein said comparing includes unlocking at least one door in the vehicle if the vehicle identification and registration information matches the data stored in the vehicle. See col.8 lines 59-68.

8. In regard to claim 7, Hofmann teaches a method for identifying and registering a vehicle, wherein said comparing includes unlocking an ignition system of the vehicle if the vehicle

Art Unit: 2676

identification and registration information matches the data stored in the vehicle. See col.8 lines 59-68.

9. In regard to claim 8, Hofmann teaches a method for identifying and registering a vehicle, further comprising updating the portion of the vehicle identification and registration information being displayed on the electronic license plate if the vehicle identification and registration information is new. See col.8 lines 1-7.

10. In regard to claim 10, Hofmann teaches a method for identifying and registering a vehicle, wherein said remote control unit is an FOB (magnetic card). See col.6 lines 30-35.

11. In regard to claim 11, Hofmann teaches a method for identifying and registering a vehicle, wherein said remote control unit is a smart card. See col.6 lines 30-35.

12. In regard to claim 12, Hofmann teaches a method for identifying and registering a vehicle, further comprising an interface unit on the vehicle for communicating with said remote control unit. See col.6 lines 17-20.

13. In regard to claim 13, Hofmann teaches a method for identifying and registering a vehicle, wherein said interface unit communicates with said remote control unit over wireless link (radio). See col.6 lines 25-35.

14. In regard to claim 14, Hofmann teaches a method for identifying and registering a vehicle, wherein said interface unit is a transponder. See col.6 lines 17-20.

15. In regard to claim 15, Hofmann teaches a method for identifying and registering a vehicle, wherein said at least one computer includes a comparator for comparing vehicle identification and registration information being received from said remote control unit with that

Art Unit: 2676

stored in said at least one computer for updating said at least one computer if the vehicle identification and registration information is new. See col.8 lines 59-68.

16. In regard to claim 16, Hofmann teaches a method for identifying and registering a vehicle, further comprising a smart chip in said FOB. See col.6 lines 5-15.

17. In regard to claim 17, Hofmann teaches a method for identifying and registering a vehicle, wherein said FOB is a key FOB (magnetic card). See col.6 lines 30-35.

18. In regard to claim 18, Hofmann teaches a method for identifying and registering a vehicle, further comprising a smart chip in said smart card. See col.6 lines 30-35.

19. In regard to claim 19, Hofmann teaches a method for identifying and registering a vehicle, further comprising: a vehicle identification number tag coupled to said vehicle; and a smart chip embedded in said vehicle identification number tag for storing vehicle identification and registration information. See col.6 lines 52-58.

20. In regard to claim 20, Hofmann teaches a method for identifying and registering a vehicle, wherein said electronic license plate comprises: a light emitting diode back panel; and a liquid crystal display front panel. See col.9 lines 8-12.

Conclusion

21. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Tam D. Tran** whose telephone number is **703-305-4196**. The examiner can normally be reached on MON-FRI from 8:30 – 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Matthew Bella** can be reached on **703-308-6829**.

Any response to this action should be mailed to:

Art Unit: 2676

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 872-9314 (for Technology Center 2600 only)

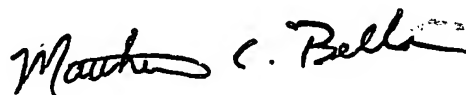

Hand-delivered response should be brought to Crystal Park II, 2121 Crystal Drive,
Arlington, VA, Sixth floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding
should be directed to the Technology Center 2600 Customer Service Office whose
telephone number is (703) 306-0377.
